## A great taste experience when it comes to coffee

*We the coffee roasters of +32 Coffee Made in Belgium have made it our sole mission: to create a unique taste experience when it comes to coffee*

Only selected and distinguished raw coffee varieties from all over the world are put together by us to a fine gourmet coffee which is competed in a gentle roasting process for the best digestibility.

This way our coffee can develop its distinctive generous taste.

We are tirelessly looking for more exquisite coffee varieties: That means, if a harvest is of a lower quality than expected, it will immediately be taken out of the program.

**Since our coffee is a natural product, it is prone to slight variations in its taste, depending on how good the harvest was – we are not marketing industrial coffee that repeats itself in taste.**
